Current Address

Quetzales #135, San Jemo
Monterrey, Mexico 64640

Education

Computer Technology Engineering

- Universidad de Monterrey
- August 2010 - Present
- 8th Semester
- Estimated time of graduation : Dec 2014
- GPA 90/100

Work Experience

Twitt2go.com / co-founder / May 2013 - Present

- Delivery services via Twitter, as simple as sending a tweet and getting your food at your doorstep.
- We received seed funding from Naranya, a technology accelerator here in Monterrey.
- We were selected to participate in the Plug and play demo day and in the Latam Invasion, both events in Silicon Valley past September.

Blooders.org / co-founder / March 2013 - Present

- Blooders it's a non profit with the goal to connect people that needs blood in urgency with volunteer blood donors.
- We won the prize "Making more health" from an Ashoka initiative called Avancemos.
- We are currently working to make partnership with other non profits in the same field.

Ubicadoc.com / co-founder / July 2013 - December 2013

- Ubicadoc it's an application that let's you find and make appointments with doctors.
- At that time the team didn't have much experience so the project failed because we didn't use any startup methodology like "lean startup". We tried to put a lot of things in the software that the people didn't want and also the idea wasn't validated. Ubicadoc it's no longer online, but the team learned a lot from it.

Robauto / App developr (Android) / August 2013

- It is an application for android that help you know if a car it's stolen in the city of Monterrey.

Usuplye.me / StartupBus / August 2013

- I participated in the StartupBus (Mexican bus). My team and I got into the 5 finalist with this application. The main purpose of usuplye it's to connect buyers with suppliers, but It works in a different way, instead you posting what you buy, buyers post what they want and suppliers make them offers.
- We didn't continue the idea after the StartupBus.
